

RDG5 Custom Displacement Guide

Intermediate Guiding
For Web Widths Up to 26 Inches (650mm)

The **RDG5** is a “robust” Displacement Guide which accommodates web widths up to 26-inches (650mm). The RDG5 maintains the web alignment on virtually any web processing machine with minimal entering and exiting web spans. Its unique design incorporates very few moving parts-thus ensuring maximum reliability in dusty (even dirty) production conditions. A 3-point suspension system provides maximum, rugged support. And an optional Outboard Sensor Positioner allows the operator to make coarse and fine adjustments to the sensor.
