

## Cantilevered Unwind Shifting Stand

The “**CRS1**” is a cantilevered unwind stand which provides unwind guiding capabilities for web widths up to 20”. This rugged unit can easily shift up to 200 lbs. on narrow web applications. Power is provided by a 6” diameter air cylinder with a 4” stroke. Unwind stands come pre-piped, mounted on custom stands equipped with a single raceway assembly with 1” race rods. Dual shifting idler rollers are standard with all unwind stands to insure a proper web plane is maintained through the sensor. This compact unwind stand is perfect for pharmaceutical, medical, food packaging as well as label and other narrow web applications. As with all Coast guiding systems, it is protected by our exclusive **10 year warranty**.

**Note:** Brakes, air shafts and tension controls are available upon request and are subject to Customer’s specification.
